

PHLEBOTOMY

EXPAND YOUR OPTIONS IN HEALTH CARE

PROGRAM DESCRIPTION

A phlebotomy technician is a healthcare professional who collects and transports specimens to the medical laboratory for medical testing, which aids the physician in diagnosis and treatment monitoring. Training in the MCC Phlebotomy Program includes anatomy and physiology, safety and infection control, blood collection procedures, standards of practice, quality assurance, legal issues and professionalism and integrity.

Phlebotomists collect blood and urine samples for lab analysis. They usually work under the supervision of physicians, nurses, medical technologists or managers in hospitals, labs or physicians' offices. The program curriculum aligns with national phlebotomy certifications.

CONTACT HOURS

57 hours + 100 clinical hours

WORKFORCE & ECONOMIC DEVELOPMENT

METROPOLITAN COMMUNITY COLLEGE

YOUR COLLEGE. **FUTURE.**

STUDENT REQUIREMENTS

- High school diploma or GED
- Completed MCC application – www.mcckc.edu/apply
