Associate in Arts (A.A.)

Psychology Emphasis – Part-Time Advising Guide

Psychologists study mental processes and human behavior. They observe, interpret, and record how people relate to one another and the environment. They look for patterns to understand and predict behavior. Our psychology pathway is built around the Associate in Arts (AA) degree. A graduate degree is usually required in order to work in the field. This degree gives you a solid two-year background in general education courses that can transfer to a four-year institution.
