MCC
METROPOLITAN COMMUNITY COLLEGE
NURSING
@MCCKansasCity
Apply for free at mcckc.edu/apply-now

Metropolitan Community College's reputation is solid and area employers know and hire from MCC's nursing program. Choose from three program options below.

PRACTICAL NURSING

In one year you'll be prepared to gain entry into the nursing field from an approved practical nursing program. You can take classes during the day and earn a practical nursing certificate in less than 12 months.

You'll be prepared to take the National Council of State Boards of Licensure Examination for Practical Nurses (NCLEX-PN).

LPN TO ADN BRIDGE

If you're an LPN, the next step up the career ladder, higher salary, more responsibility and greater opportunity is to become a registered nurse (RN).

Our one-year program takes into account your training and experience so you can "bridge" the gap to an associate degree in nursing (ADN) and prepare you to apply for the National Council Licensure Examination for Registered Nurses (NCLEX-RN).

PROFESSIONAL NURSING

RN's provide direction to licensed practical nurses (LPNs) and nursing aids. Our two-year program gives you an associate degree and prepares you to apply for the National Council Licensure Examination for Registered Nurses (NCLEX-RN).

MCC's professional nursing program offers students great flexibility, with traditional daytime and weekend/evening.

For upcoming application periods, go to mcckc.edu or contact the MCC Nursing Department at 816-604-4175 or by email at PV.Nursing@mcckc.edu.

Why MCC Nursing Program? Hands-on training and outstanding instruction in our state-of-the-art Health Science Institute; Access to the Virtual Hospital, a cutting-edge facility that lets nursing students learn by working in a high-tech simulated hospital environment; MCC's degreed nursing instructors bring real-world experience to your classroom; Real-world clinicals with placements available throughout the metro.
